

MR. CAMERON, EXAM. BY MR. ROBERTS

1 They would have been out of there, and we would have had
2 26 people alive today.

3 Q. Well --

4 A. So I regret that.

5 Q. We know that in November of 1988, Mr. Frame wrote to
6 Harry Rogers to give him an analysis of the risks that
7 Westray had identified --

8 A. Um-hmm.

9 Q. -- in developing the Foord seam. Are you familiar
10 with that letter?

11 A. I'm aware that that was done, yeah.

12 Q. And we'll -- maybe we can look at that. That's in
13 Exhibit 76, at tab 9.

14 A. And -- 76.

15 Q. Tab 9, beginning at the beginning of the tab, do you
16 see that?

17 A. Yes.

18 Q. And in the third page of that letter, which is
19 stamped page 44, Mr. Frame gets to the risks as he is
20 identifying them, and he lists them as follows:

21 "Unforeseen geological faults. Excessive water."

22 A. Uh --

23 Q. Do you have that?

24 A. What paragraph?

25 Q. It's at the very top of the page. Do you see the
